PURE LIFE HOSPITAL-
BUSINESS ANALYSIS OF PATIENTS RECORDS

- As a Health Intelligence professional, I was tasked with analyzing Pure Life Hospital's patient and operational records to identify performance deficiencies, provide strategic recommendations, and deliver actionable insights that enable leadership to make informed decisions and prevent operational or financial decline.

HARRISON BAFFOE-MENSAH

PURE LIFE HOSPITAL

- EXECUTIVE SUMMARY

The hospital generated approximately **$294.03M in revenue** from **5,000 admissions**, with an average length of stay (ALOS) of **3.56 days** and a mortality rate of **2.22%**.
Most patients are successfully discharged, indicating generally positive clinical outcomes. However, patient demand is concentrated in specific diagnoses and visit types, creating potential resource allocation and capacity planning challenges.

OUTPATIENT SERVICES DRIVE HOSPITA ACTIVITY

PURE LIFE HOSPITAL

- THE DATA SHOWS
  Outpatient: 2.5K admissions
  Inpatient: 1.5K admissions
  Emergency: 1.0K admissions
  Business Interpretation
  Outpatient visits account for approximately **50% of all admissions**, making them the hospital's primary service channel.
  Recommendation
  Prioritize staffing and scheduling for outpatient departments.
  Expand outpatient capacity during peak periods.
  Implement appointment optimization to reduce wait times and improve patient throughput.

HARRISON BAFFOE-MENSAH

REVENUE PERFORMANCE FLUCTUATES ACROSS THE YEAR

- The monthly revenue trend shows:
  Revenue dips around months 2, 4, and 7.
  Revenue peaks around months 6 and 11.
  Business Interpretation
  The hospital experiences seasonal fluctuations in revenue generation.
  Recommendation
  Investigate causes of low-performing months.
  Align staffing and operational budgets with seasonal demand.
  Launch targeted preventive care campaigns during historically slower periods.

HARRISON BAFFOE-MENSAH

DIGESTIVE DISORDERS REPRESENT TH LARGERST ADMISSION CATEGORY

- Top diagnosis categories:
  Digestive System Disorders (873)
  Infectious & Parasitic Diseases (692)
  Cardiovascular Diseases (554)
  Malignant Neoplasms (546)
  Business Interpretation
  Digestive disorders generate the highest patient volume and likely consume a significant portion of hospital resources.
  Recommendation
  Review staffing levels in Gastroenterology.
  Develop preventive health education programs.
  Create specialist care pathways to improve treatment efficiency.

MORTALITY RATE REQUIRES DEPARTME LEVEL INVESTIGATION

PURE LIFE HOSPITAL

- Current mortality rate:
  2.22%

HARRISON BAFFOE-MENSAH

AVERAGE LENGTH OF STAY APPEARS EFFICIENT

- Current ALOS:
  3.56 days
  Business Interpretation
  A relatively short stay may indicate efficient patient management and bed turnover.
  However, leadership should verify whether shorter stays correlate with readmissions.

HARRISON BAFFOE-MENSAH

STRONG DISCHARGE PERFORMANCE

- Outcome status chart suggests:
  Approximately 85% discharged
  Small percentages admitted, transferred, or deceased
  Business Interpretation
  The majority of patients complete treatment successfully.

HARRISON BAFFOE-MENSAH

CONCLUSION

Pure Life Hospital generated $294.03M from 5,000 admissions while maintaining a relatively low mortality rate of 2.22% and an average length of stay of 3.56 days. Outpatient services account for half of all admissions and represent the hospital's primary demand driver. Digestive system disorders constitute the largest diagnostic category, suggesting an opportunity for targeted resource allocation and preventive care initiatives.
